I downloaded the program and after much typing and scrolling through instructions, it said it was successfully installed. It said to go to my "Creator" menu and I did. However, when I opened it, it simply said that I had no plugins and gave me the option to download them. I did this and it downloaded three files and said "Extracting, please wait" It then said that it was successful. However, when I opened the programme, the same thing happened, it said that it was successful, but when I went to my Creator menu, the same thing happened as before. I tried to run it from the "Creator" menu and it gave me an error message saying that it was not compatible with my operating system. I then tried to install the plugin package it gave me the error message again, and when I tried to download the plug in package, I was told that the software was incompatible with my operating system. If the software is not compatible with my operating system, what do I do? _VERIFIED_ Rip Roar Video Creation Station Software Download My Rip Roar Video Creation Station camera is a 7th generation model. The software to install is V. 6.0. What is the problem and what do I need to do to install it and run it? rip roar video creation station software download I have the CD from the UK with the software I downloaded. The software works on Windows 7, but when I insert the CD and choose the option to install the software, I receive a message saying that the software is incompatible with Windows 7. I have done everything I can to install the software, but when I do, it says that I have an invalid operating system and that I need to download a newer version of the software. If I do this, will it be compatible with my camera? rip roar video creation station software download My company gave me this camera for work and we use Windows 7. It is very frustrating to have to continue to have to go to the website and download the latest software, which is often not compatible with my operating system and I have to return to this website every time I want to install a new version of the software. I would be very grateful if someone could tell me what I can do to get this software to run on my computer. Have I missed anything? 4bc0debe42
